Q3 What is your biggest concern regarding Lexington's long-term water supply and drought preparedness?

Answered: 48 Skipped: 6

Here are the key common concerns from the community feedback:

1. **Water Supply Concerns:**
 - Running out of water/water shortage
 - Depleted groundwater
 - Wells running dry
 - Water capacity and pressure
 - Extreme drought risks
 - Impact of development on water resources
2. **Water Quality Concerns:**
 - Clean and healthy water availability
 - Old/bad pipes
 - Orange water
 - Infrastructure issues
 - Water not being drinkable
 - Pipe and pump reliability
3. **Water Distribution Concerns:**
 - Large amounts of water being sold/routed to other cities and corporations
 - Water being taken from local aquifers
 - Lack of restrictions on water movement
 - Water marketers taking local water resources
4. **Water Management Concerns:**
 - Lack of comprehensive drought preparedness plans
 - Insufficient protest against water selling
 - Need for emergency water interconnection
 - Need for more wells to compensate for growth
 - Lack of transparent communication about water resources
 - Concerns about future water availability during development
5. **Preparedness and Notification Concerns:**
 - Effective notification before water shut-offs
 - Informational resources about water management
 - Proactive planning for extreme scenarios

The most frequently mentioned concerns revolve around water shortage, water quality, and the redistribution of local water resources to other communities and corporations.

Here's a **summary and categorization** of the citizen concerns regarding water in the City of Lexington. These concerns are organized into key themes for clarity:

Water Supply & Availability

- Fear of **running out of water**, especially during droughts and emergencies.
 - Concern that **too much water is being diverted to other communities** (e.g., San Antonio), depleting local supplies.
 - Worry that **large companies and water marketers** are extracting water from local aquifers at unsustainable levels.
 - Concern that **groundwater and wells are drying up**, especially with continued development and hotter summers.
 - Citizens want to know if there are **restrictions in place on water exports** to other counties or corporations.
-

Water Quality

- Reports of **discolored, undrinkable water** (e.g., “orange water” ruining clothes and fixtures).
 - Concerns about **aging infrastructure and bad pipes** causing contamination.
 - General dissatisfaction with the **quality and cleanliness** of current drinking water.
-

Infrastructure & Reliability

- Frequent **pump failures and well issues** noted, especially in the past year.
 - Need for **redundant systems**: additional wells, storage, and pumping capacity.
 - Suggestions for **interconnections to neighboring TCEQ-approved systems** for emergency backup.
 - Requests for **relocation of critical infrastructure** (like the water works center) away from the town square as it becomes more developed.
-

☒ Emergency Preparedness

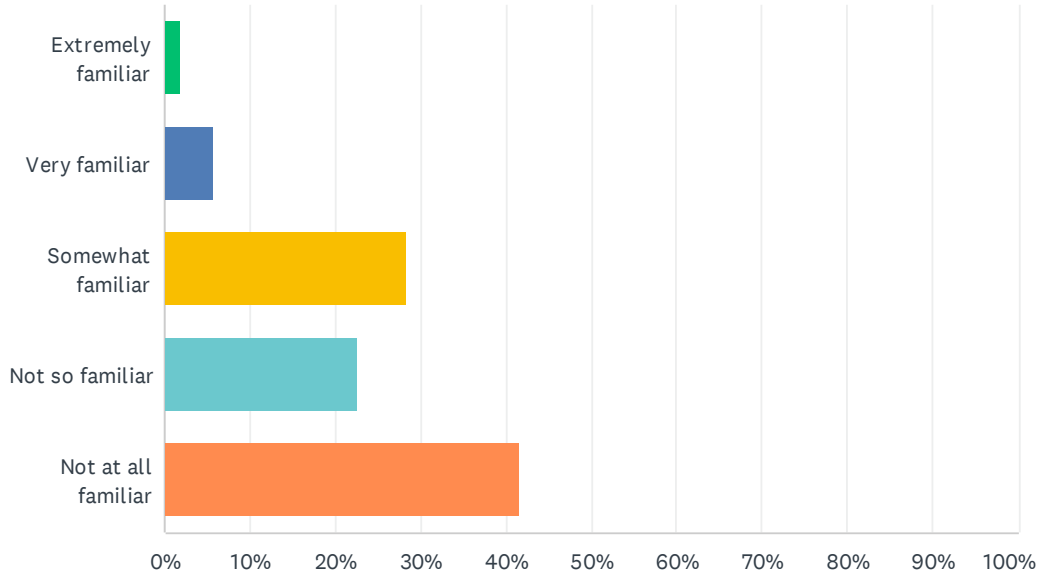

- Worry over **lack of water access during wildfires or extreme droughts**.
 - Requests for a **Drought Preparedness Plan** to protect community health and safety.
 - Desire for **effective communication** and timely **notifications during water shutoffs** or outages.
-

☐ Governance & Oversight

- Perceived **lack of action or protest** from the city to prevent water sales to outside interests.
 - Frustration over past decisions (e.g., routing water to San Antonio).
 - Calls for **better planning and policy enforcement** to ensure long-term sustainability.
 - Questioning whether there is **adequate oversight of water rights and use**.
-

Q4 How familiar are you with Lexington's current plans, studies, reports, and policies?

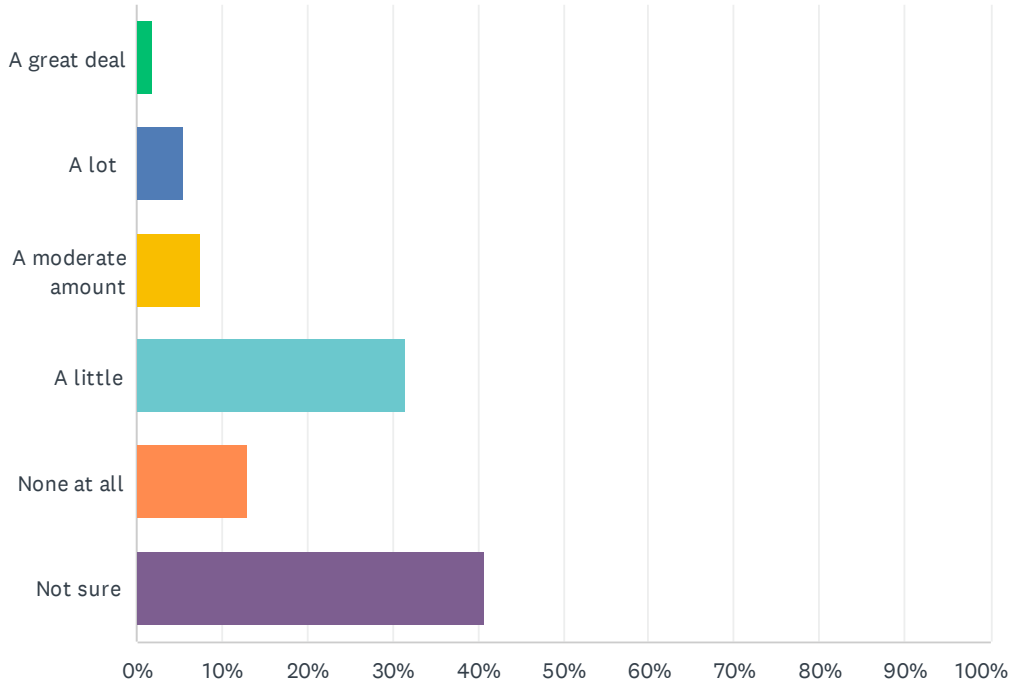

Answered: 53 Skipped: 1

ANSWER CHOICES	RESPONSES	
Extremely familiar	1.89%	1
Very familiar	5.66%	3
Somewhat familiar	28.30%	15
Not so familiar	22.64%	12
Not at all familiar	41.51%	22
