Winter Storms	0.81% 1	4.07% 5	9.76% 12	23.58% 29	55.28% 68	6.50% 8	123	2.52

These themes represent the primary issues raised in the survey responses, with water scarcity due to growth and development being the most prominent concern.

Summary of the Wimberley community survey results by common issues. Here's a breakdown of the main concerns expressed:

1. Excessive Growth and Development:
   - Unchecked construction of new homes, subdivisions, and RV parks
   - Rapid population growth beyond sustainable levels
   - Lack of authority or willingness to regulate growth
   - Concern about developers having too much power
2. Water Scarcity and Depletion:
   - Fear of running out of water
   - Declining aquifer levels
   - Drought conditions affecting water availability
   - Concern about wells running dry
3. Insufficient Water Management and Regulation:
   - Lack of restrictions on new well drilling
   - Inadequate water conservation measures
   - Concerns about Aqua Texas (over-pumping, leaks, non-compliance with drought restrictions)
   - Need for better groundwater allocation and regulation
4. Environmental and Quality of Life Concerns:
   - Impact on local springs and creeks (e.g., Jacob's Well, Cypress Creek)
   - Loss of natural spaces and increased concrete coverage
   - Potential for wildfires
   - Concerns about maintaining the area's character and small-town feel
5. Infrastructure and Planning Issues:
   - Lack of long-term water supply planning
   - Need for alternative water sources (e.g., rainwater collection, desalination)
   - Inadequate preparation for drought conditions
   - Calls for mandatory water-saving measures in new construction

6. Economic Impacts:

- Potential loss of tourism due to water scarcity
- Concerns about property values declining
- Impact on local businesses relying on water-based attractions

7. Changing Climate Conditions and Drought:

- Prolonged drought conditions
- Lack of rainfall to recharge aquifers
- Long-term sustainability concerns

****

Based on the water usage breakdown from the community survey input for Wimberley, TX, the following are some suggestions for better water conservation in the community. These recommendations take into account the diverse water sources used by residents.

1. Community-wide initiatives:

- Implement a tiered water rate structure that encourages conservation
- Launch a public education campaign on water conservation techniques
- Offer water audits to help residents and businesses identify leaks and inefficiencies
- Promote xeriscaping and native, drought-resistant landscaping
- Implement and enforce watering schedules during dry periods

2. For City Water users (30):

- Install smart water meters to detect leaks and monitor usage in real-time
- Upgrade city infrastructure to reduce water loss from leaks
- Offer rebates for water-efficient appliances and fixtures
- Implement a greywater reuse program for city facilities

3. For Aqua Texas customers (24):

- Work with Aqua Texas to improve leak detection and repair processes
- Advocate for transparent reporting of water usage and conservation efforts
- Encourage Aqua Texas to offer conservation incentives to their customers

4. For Well owners (36):

- Provide education on aquifer health and sustainable withdrawal rates
- Offer free well testing to ensure water quality and identify potential issues

- Encourage well owners to monitor their water levels and report significant changes
- Promote the use of low-flow fixtures and efficient irrigation systems

5. For Rainwater Collection users (10):
- Offer incentives or tax breaks for expanding rainwater collection systems
- Provide workshops on maintaining and optimizing rainwater collection systems
- Encourage sharing of best practices among rainwater collection users

6. Cross-cutting suggestions:
- Require all new construction to include water-saving features (low-flow fixtures, dual-flush toilets, etc.)
- Mandate rainwater collection systems for new builds over a certain size
- Implement a city-wide leak detection program
- Encourage businesses to adopt water-saving practices and recognize those who do
- Create a community water conservation task force with representatives from all water sources

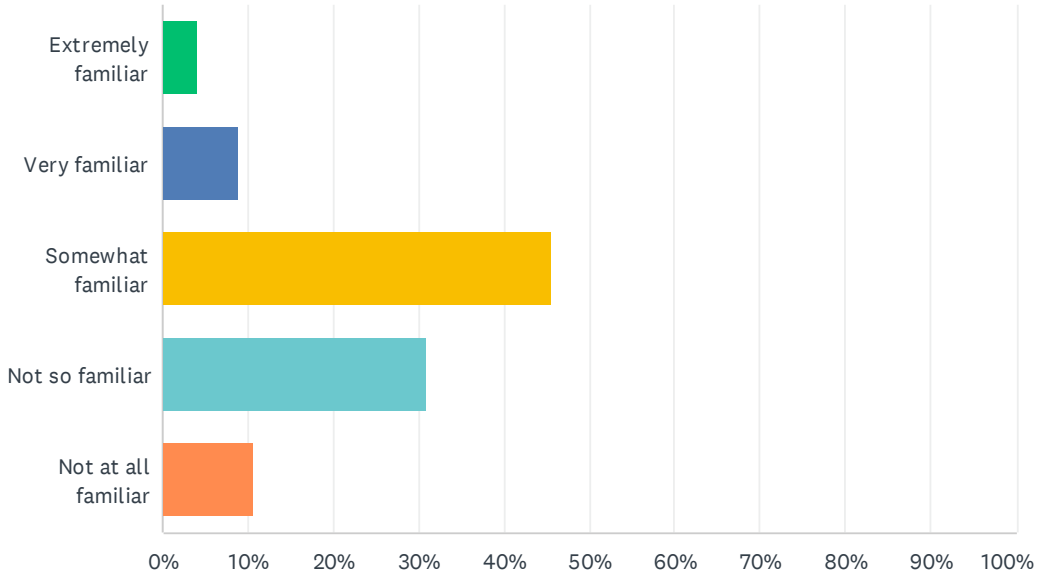

7. Long-term strategies:
- Develop a comprehensive water management plan that accounts for population growth and climate change
- Explore the feasibility of water recycling and reuse programs
- Investigate potential for aquifer recharge projects
- Consider partnerships with neighboring communities for regional water conservation efforts

8. Leveraging technology:
- Implement a city-wide smart irrigation system for public spaces
- Develop a mobile app for residents to report water waste and leaks
- Use data analytics to identify high water users and target conservation efforts

These suggestions aim to address the diverse water sources in Wimberley while promoting community-wide conservation efforts. Implementation would require cooperation between the city, Aqua Texas, and residents, but could significantly improve water conservation in the community.

Q5 How familiar are you with Wimberley's current plans, studies, reports, and policies?

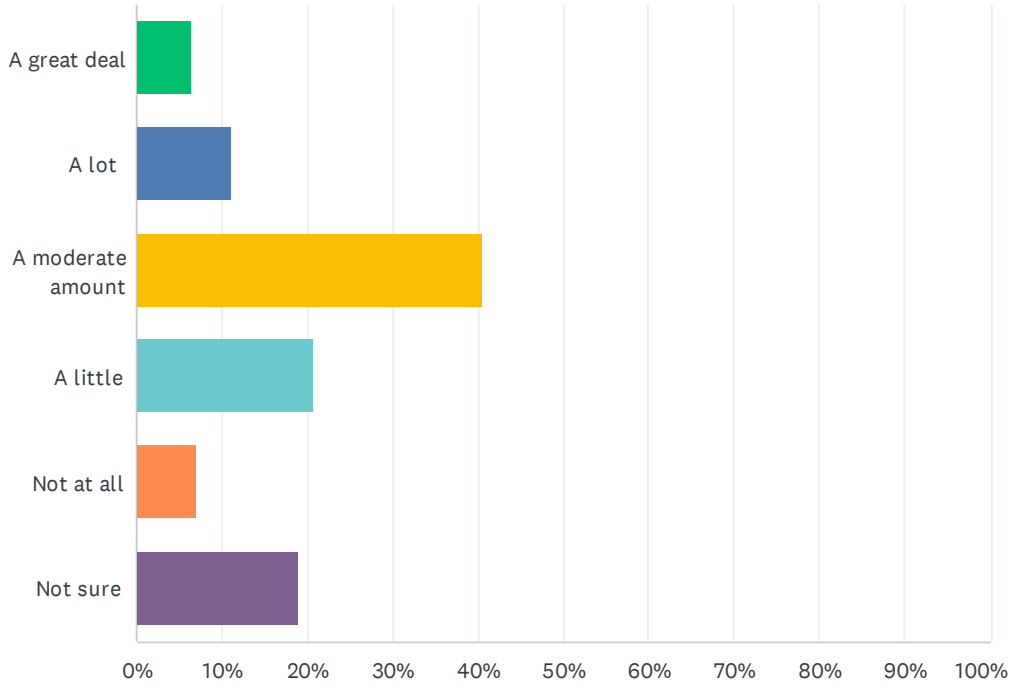

Answered: 123 Skipped: 4

ANSWER CHOICES	RESPONSES	
Extremely familiar	4.07%	5
Very familiar	8.94%	11
Somewhat familiar	45.53%	56
Not so familiar	30.89%	38
Not at all familiar	10.57%	13
TOTAL		123

Q6 How prepared is Wimberley with evacuation routes, emergency sheltering plans, and communication for disasters?

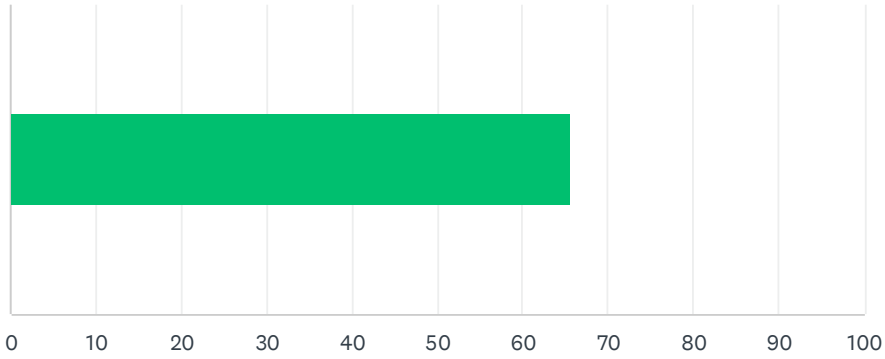

Answered: 126 Skipped: 1

ANSWER CHOICES	RESPONSES	
A great deal	6.35%	8
A lot	11.11%	14
A moderate amount	40.48%	51
A little	20.63%	26
Not at all	7.14%	9
Not sure	19.05%	24
